

Design Elements Cheat Sheet

The 80/20 of design principles to give your website an incredible look

Subtle Animated Background (Motion Without Noise)

What to ask for

- Soft animated gradient
- Light field / beam texture
- Particle drift
- Grid shimmer
- Slow parallax abstract shapes

Why it works

- Makes the page feel *alive*
- Adds depth without distracting
- Signals polish at a glance

Important rule

Background motion should be slower than reading speed.

This gives that “insane but calm” vibe.

Intentional Micro-Interactions (Everything Reacts)

What to ask for

- Button hover glow or border beam
- Cards lifting slightly on hover
- Icons animating on hover only
- Cursor-proximity effects (subtle)

Why it works

- Feels tactile
- Encourages exploration
- Makes UI feel responsive, not static

Prompt cue

“Add subtle hover states and micro-interactions that reinforce clickable intent.”

Progressive Reveal on Scroll (Rhythm + Momentum)

What to ask for

- Staggered fade-in
- Slide + fade combo
- Sequential section reveals

Why it works

- Creates visual pacing
- Prevents cognitive overload
- Guides attention naturally

Key insight

Motion should *reward scrolling*, not compete with content.

Depth Layers (Shadows, Glass, Separation)

What to ask for

- Soft XL shadows
- Angled shadows for cards
- Glass / blur panels (sparingly)
- Clear foreground vs background separation

Why it works

- Adds hierarchy
- Makes content “float”
- Avoids flat, template-looking layouts

Rule

Darker background → stronger shadows

Lighter background → softer shadows

Strong Typography Contrast (Instant Authority)

What to ask for

- Big, confident hero type
- Tight heading line-height
- Simple body font
- Clear weight contrast

Why it works

- Typography *is* design
- Instantly communicates confidence
- Separates premium from amateur

Prompt cue

“Use bold typographic contrast with large headings and restrained body text.”

Give something special.

Find what they've been waiting for all year.

Shop gifts

Apple (Editorial Minimalism) 🍏

Use when:

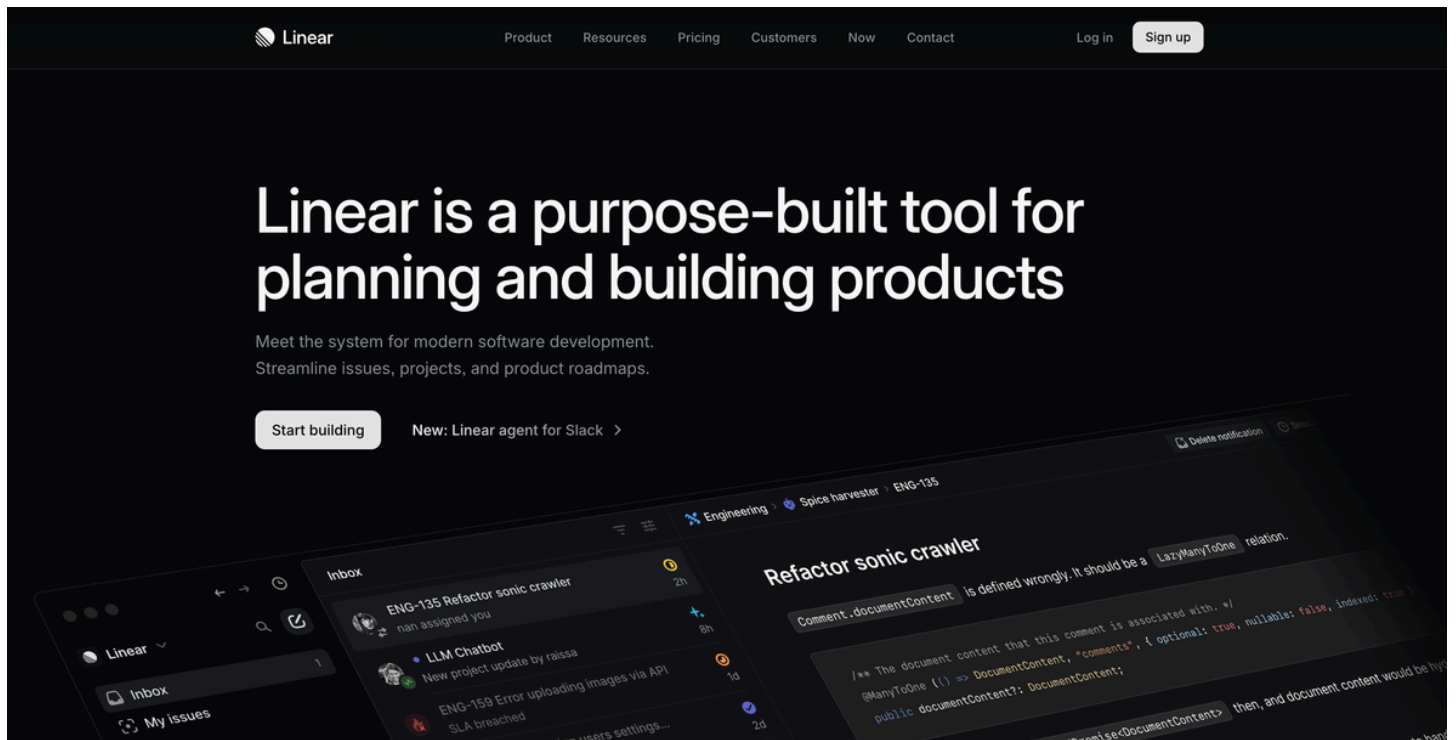

You want trust, authority, and timeless quality.

Style prompt addition:

"In the style of Apple — clean editorial layout, large confident typography, generous whitespace, minimal color palette, subtle motion only where it reinforces clarity."

Signals to Gemini:

- Fewer elements
- Bigger text
- Calm animations
- Zero clutter

Linear (Modern SaaS Precision)

Use when:

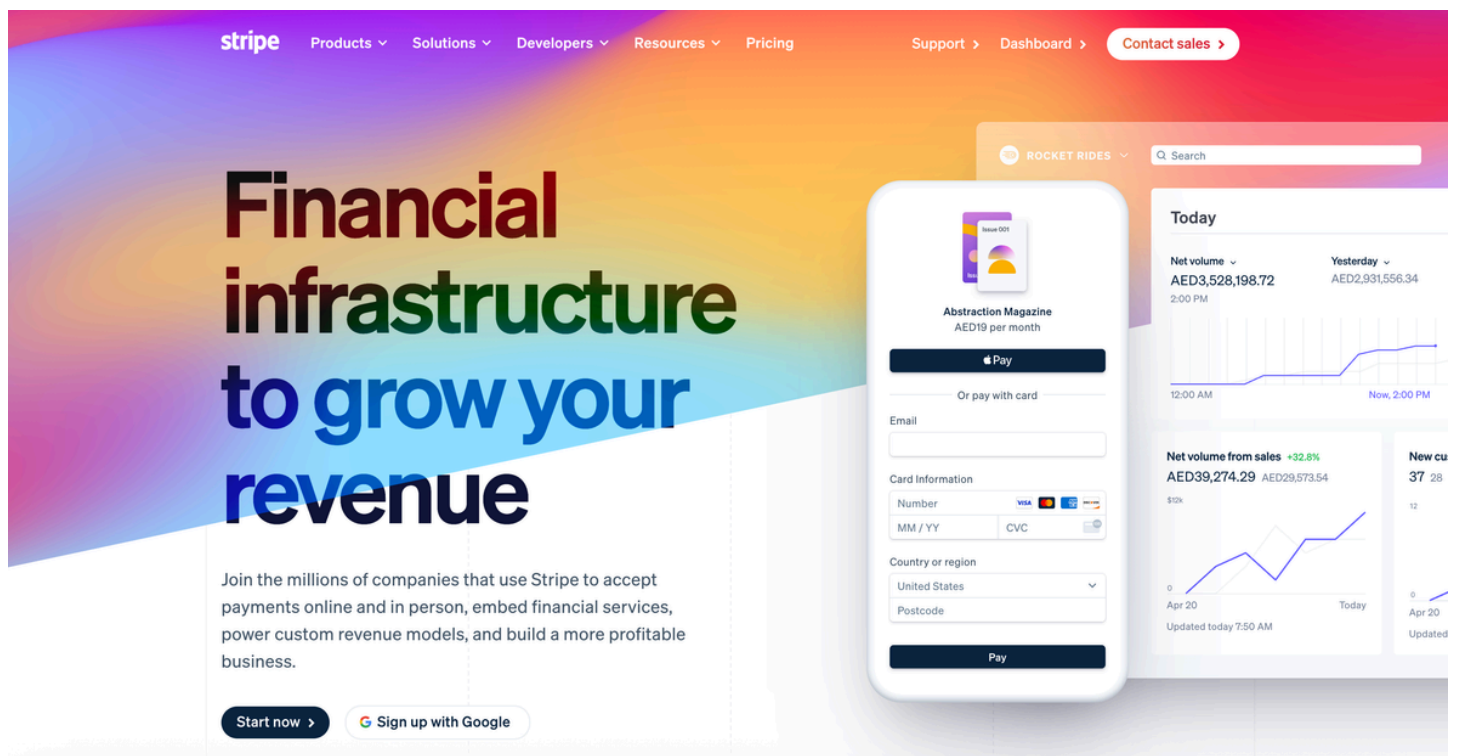

You want elite startup / dev-tool vibes.

Style prompt addition:

“In the style of Linear — sharp contrast, subtle gradients, precise spacing, disciplined motion, and a modern dark-mode-forward aesthetic.”

Signals to Gemini:

- Crisp UI
- Controlled gradients
- High signal-to-noise ratio
- Tasteful micro-interactions

Stripe (Professional System Design) 🇦🇪

Use when:

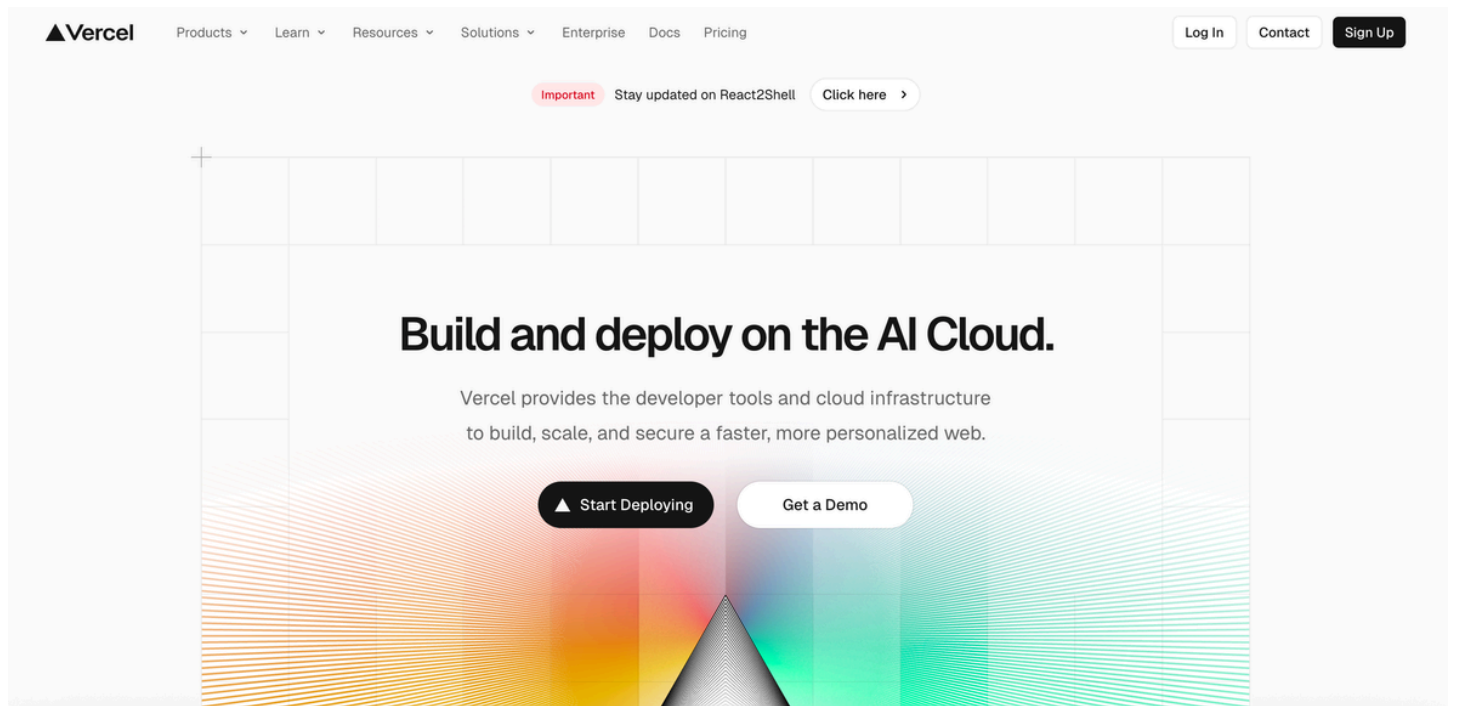

You want credibility + scale + engineering maturity.

Style prompt addition:

"In the style of Stripe — structured layouts, clear system thinking, strong grid alignment, restrained animations, and an emphasis on trust and professionalism."

Signals to Gemini:

- Strong layout logic
- Clear sections
- Conservative motion
- Serious tone

Vercel (Developer-Forward, Experimental Clean) ⚡

Use when:

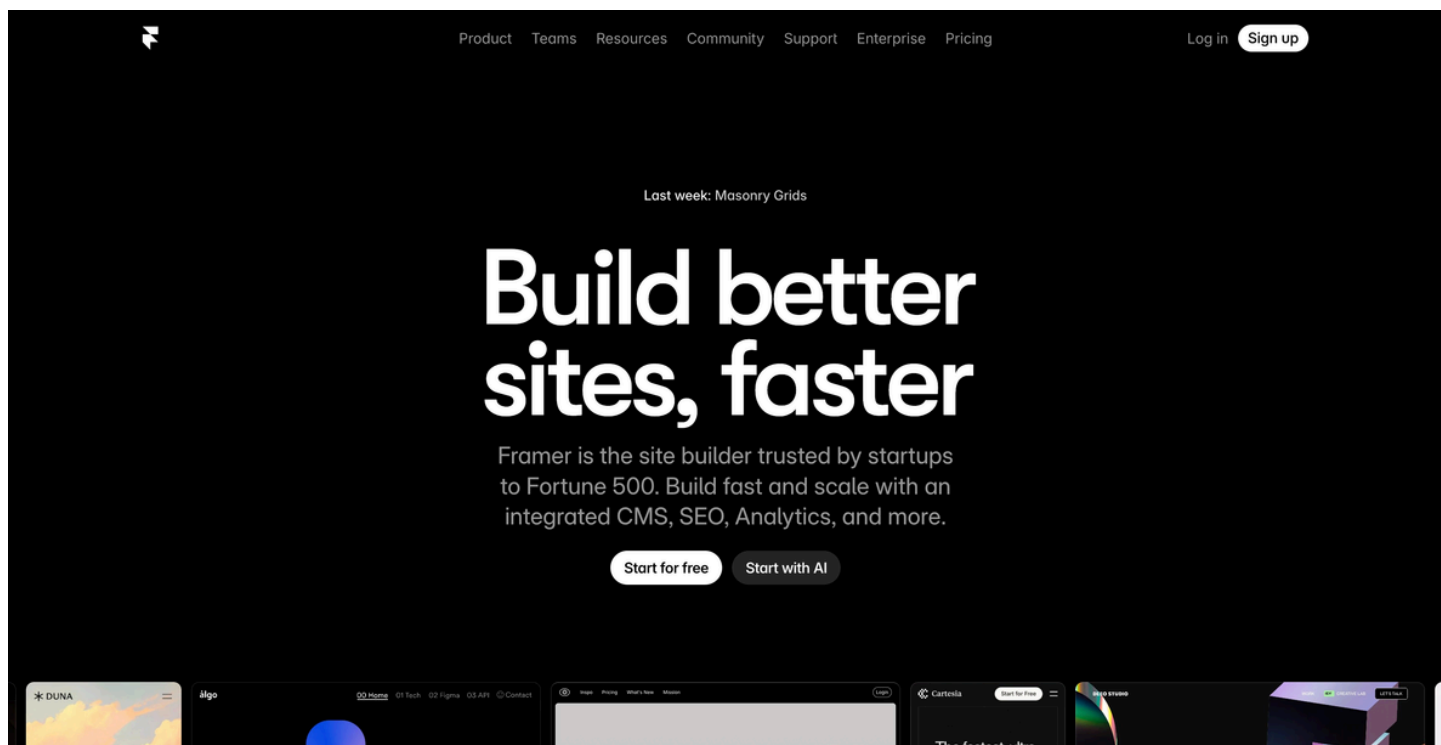

You want cutting-edge without being flashy.

Style prompt addition:

"In the style of Vercel — minimal UI, intentional motion, subtle experimental effects, strong contrast, and developer-focused clarity."

Signals to Gemini:

- Motion with purpose
- Subtle glow / blur
- Clean but modern
- No fluff

Framer / Modern Studio Minimalism 🎛️

Use when:

You want motion-led, design-forward polish.

Style prompt addition:

“In the style of high-end Framer showcase sites — smooth transitions, refined animations, modern typography, and expressive but controlled visual storytelling.”

Signals to Gemini:

- Better motion timing
- Scroll choreography
- Design-led feel
- “Agency quality” output

🎛️ 20 DESIGN-SPECIFIC PROMPTS

1. Hero Headline 🧠

Prompt:

"Make the hero headline visually dominant using large typography, tight line-height, and strong contrast. Ensure no other element competes with it above the fold."

2. Primary CTA Button

Prompt:

"Enhance the primary CTA with a subtle border beam or glow animation on hover, making it feel interactive without being distracting."

3. Secondary CTA

Prompt:

"Reduce the visual priority of the secondary CTA using lower contrast and delayed reveal, while keeping it clearly accessible."

4. Animated Background

Prompt:

"Add a slow, subtle animated background (gradient, beam, or abstract motion) that adds depth without interfering with foreground text readability."

5. Scroll Indicator

Prompt:

"Introduce a minimal scroll indicator that gently animates to suggest continuation without pulling attention away from the hero message."

6. Hero Visual / Mockup

Prompt:

“Apply a subtle float or parallax effect to the hero visual so it feels dimensional and responsive to scrolling.”

7. Card Components

Prompt:

“Enhance card components with soft shadows and a slight lift on hover to create depth and reinforce interactivity.”

8. Icon System

Prompt:

“Standardize all icons using a single SVG icon set with consistent stroke weight and add subtle hover animation where relevant.”

9. Typography Rhythm

Prompt:

“Refine typography hierarchy by increasing contrast between headings and body text using font weight, size, and spacing rather than color.”

10. Section Transitions

Prompt:

“Add gentle section transitions using fades, gradients, or dividers to visually separate content without breaking flow.”

11. Feature Grid

Prompt:

“Highlight one key feature in the grid using visual emphasis (scale, contrast, or motion) to guide attention intentionally.”

12. Social Proof Block

Prompt:

“Introduce a subtle marquee or staggered reveal animation to the social proof section to increase credibility without overwhelming the layout.”

13. Testimonial Cards

Prompt:

“Enhance testimonial cards by emphasizing the outcome text and applying a refined reveal animation on scroll.”

14. Pricing Cards

Prompt:

“Visually emphasize the recommended pricing tier using contrast, elevation, or a soft glow to guide decision-making.”

15. Navigation Bar

Prompt:

“Update the navigation bar to transition from transparent to solid on scroll, with a slight height reduction for a polished feel.”

16. Sticky Elements

Prompt:

“Add a sticky CTA element that appears after scrolling past the hero, maintaining visibility without obstructing content.”

17. Input Fields / Forms

Prompt:

“Improve form inputs with clear focus states, smooth transitions, and inline feedback animations for validation or success.”

18. Content Reveal / Accordion

Prompt:

“Use animated expand/collapse interactions for long-form content to reduce cognitive load and maintain visual cleanliness.”

19. Footer CTA

Prompt:

“Design a strong footer CTA with increased contrast and emotional emphasis to act as the final decisive moment.”

20. Page Rhythm / Spacing

Prompt:

“Adjust vertical spacing rhythm across sections to create clear breathing room and a smooth narrative flow down the page.”
